

Requirements

Python 2.7.x

Selenium 3.8.1

Phantomjs 2.1.3

How-to

1. Edit the scripts in order to add your path to phantomjs executable
2. Launch “SpliceProfilesListFromGoogle.py” to retrieve a list of urls of authors’ profiles in Splice. Remove all the urls that are not Splice’s profile.
3. Launch “SpliceUserList.py” to mine information about Splice’s users.
4. Launch “SpliceSongList.py” to mine information about Splice’s songs.
